Non-Confidential Marketing Package

This memorandum constitutes an offer for sale of patents on behalf of the owner by IPApproach, LLC, an IP brokerage and consulting company. The information in this report is provided solely for the purpose of assisting the independent evaluation of the portfolio by prospective buyers. The information provided herein or exchanged pursuant to the sales process is not intended to be notice or accusation of infringement of any of the patents or portfolios offered for sale. Nothing in this document shall constitute or be interpreted as legal analysis regarding the scope of the patents or other intellectual property rights. Any discussion of the use or potential use of the patent portfolio is for illustrative purposes only. In making a decision regarding this sales opportunity, potential purchasers must rely on their own examination and evaluation of the patents and portfolios including the merits and risks involved. No representation or warranties regarding the patents or portfolios are provided or implied. This report and any other documents or information provided by IPApproach related to the patents or portfolios are intended for use by the receiving party solely for its use in engaging in the sales process and in determining whether to purchase the patents or portfolios. Any distribution of such report, documents or information outside of the receiving party's organization without IPApproach permission is strictly prohibited. IPApproach reserves the right to modify or discontinue the sales process at any time including accepting offers prior to the completion of the due diligence period.

IPApproach LLC is pleased to present the attached exclusive patents for sale **“Apparatus and method of for cleaning a thermostat in an internal combustion engine”** which includes U.S. Granted Patents **US 10207301 B2** assigned to **Greg Bohrer, Tina Bohrer**. The IP relates to cooling systems for marine inboard engines and for cleaning a thermostat and thermostat housing for a marine inboard engine. The technology disclosed provides the following advantages:

- ✓ The present technology does not cause malfunctioning of thermostat if the water quality drawn from the body of water is poor or contains any kind of debris.
- ✓ The invention helps to avoid over cooling and overheating of the engine.
- ✓ Allows for cleaning or clearing the thermostat and housing without the need for tools, disassembly or removal of the thermostat.
- ✓ Avoids the thermostat to get stuck in open or closed position.

The Global Marine Engine market will derive growth from the advent of electric automobiles for trading purposes. The market was valued at **USD 12.05 Billion in 2018 and exhibit a CAGR of 4.58% from 2019 to 2026. APAC** is expected to Emerge as the Leading Region for marine engines. [REDACTED]
